WORKING AT HEIGHT: ELIMINATE RISKS FROM FALLING TOOLS

Every year falling tools cause thousands of accidents with consequences effecting both health and productivity.

Tool solutions specifically suited to working in high places eliminate risks, avoid wasted time and improve productivity.

In the nuclear sector, solutions for this type of risk are designated under the term FME (Foreign Material Exclusion).

IMPROVED SAFETY

A falling tool can be extremely dangerous, particularly if it hits somebody. In addition to the severe injury it may inflict to individuals, such an accident can have major consequences for the company.

IMPROVED TIME GAIN

A fallen tool must be recovered. Climbing down from a work location, getting the tool, sometimes in confined spaces... all these take time, adding to the time required for the job.

IMPROVED SAVINGS

A falling tool may damage expensive facilities or equipment, disturb or stop a production process, even end up in a remote location and require replacement.

SAFETY LOCK SYSTEM

THE FACOM SOLUTION FOR WORKING AT HEIGHT

FACOM has always worked closely with companies from various sectors to develop tooling solutions that perfectly meet user needs.

The FACOM Safety Lock System (SLS) is perfect for those who regularly work in elevated locations, assembling and maintaining equipment above ground level.

ROBUST AND RELIABLE

FACOM's ring system is made of metal to withstand extreme shocks, temperatures, and other harsh working conditions.

The rings were designed and tested by FACOM. Their dimensions allow them to

withstand at least twice the tool's weight. The tool-ring set is also tested in a real-world situation, with a test of 400 falls per type of tool. FACOM assembles the rings in its plants with servo-controlled presses guaranteeing perfect crimping.

TRACEABILITY

An individual traction test is performed on each tool upon ring assembly. An inspection certificate is issued and a unique serial number engraved on the tool. FACOM can hence follow up its production to guarantee maximum safety. The unique serial number also ensures the tool is identified and followed throughout its lifetime.

ERGONOMICS

The tools of the SLS range were designed by FACOM specifically to preserve comfort in all conditions and the levels of performance of its standard tools.

The SLS ring slides along the wrench for optimum use of the wrench's open end and ring.

Ratchet handles are fitted with a shackle for easy snap hook fastening and freedom of movement.

The SLS ring allows screwdriver shank rotation without twisting the lanyard.

The SLS ring passes through the metal part of pliers grips to guarantee unequalled strength.

FACOM SLS: A COMPREHENSIVE RANGE OF SECURED TOOLS

The Safety Lock System comprises 190 pre-equipped tools, 3 lanyards, 2 belts, 2 belt accessories, and 2 snap hooks.

YOUR CUSTOMISED TOOLS

- Upon request, safety eye built into the tools for work in high locations.
- Your workshop in your colours.
- Workshop roller cabinets with a set of specific drawers.
- Special bits for torque wrenches.
- Finish and marking of specific products.
- Material change.

SLS ACCESSORIES

• The Safety Lock System eye system fastened to the tools is **100% compatible with the lanyards and accessories of the FACOM SLS range.**

• FACOM SLS lanyards and accessories are in the **orange colour** generally used for safety tools for **higher visibility.**

• FACOM lanyards and accessories are supplied in standard with **safety screw-on snap hooks.** Automatic snap hook closing and its screw provide a double safety of the snap hook.

• FACOM also offers snap hooks without safety screw. They are easier to handle, particularly when wearing gloves, although reducing the safety level somewhat. Choose according to your applications.

For all SLS lanyards and belt accessories, FACOM uses **stainless steel snap hooks.** They offer **excellent tensile strength, but also to extreme outdoor conditions,** i.e. work in humid or saline atmospheres.

FACOM SLS belts, belt accessories and lanyards are **tested in extreme conditions of use** to guarantee high strength..

SLS lanyards are elastic to reduce their length and enhance comfort of use. The elastic also **dampens the fall of the tool attached.**

LAN0.2 20 cm strap - 60 mm stainless steel dual snap hooks with screw - SLS

- Strap connecting tools of the FACOM SLS range to the belt.
- Fitted with 2 60 mm stainless steel locking snap hooks with screw.
- Strap particularly suited to securing offset ring wrenches series 54A to the manoeuvring handle 54.M. Also used to fasten tools to the belt.
- Strap length excluding snap hook: 200 mm.
- Strap width: 13 mm.
- Acceptable rated load: 4 kg.
- Weight: 70 g.

LAN1.2 1.2 m strap - 80 mm stainless steel dual snap hooks with screw - SLS

- Strap connecting tools of the FACOM SLS range to the belt.
- Fitted with 2 80 mm stainless steel locking snap hooks with screw.
- Strap particularly suited to securing heavy tools to the belt or external holders (ladder, scaffold, elevator platform). Strap providing optimum securing of heavy tools.
- Strap extended length excluding snap hook: 1.20 m.
- Strap width: 15 mm.
- Acceptable rated load: 6 kg.
- Weight: 175 g.

LAN-WRT1.2 1.2 m strap - Wrist loop and 80 mm stainless steel snap hook with screw - SLS

- Fitted with an 80mm stainless steel snap hook with locking screw.
- Strap particularly suited to securing light tools to the wrist. Strap ensuring high movement mobility.
- Strap extended length excluding snap hook: 1.20 m.
- Strap width: 20 mm.
- Wrist loop length: 220 mm .
- Acceptable rated load: 6 kg.
- Weight: 110 g.

CT70-100 Belt with dual point metal loop - Waist size 70-100 cm - SLS

- Belt to fasten tools of the FACOM SLS range.
- Dual point metal loop: both points must be pressed to release the loop to prevent accidental opening and ensure optimum safety.
- Supplied with comfort foam pad with velcro for optimum adjustment.
- Belt compatible with the accessories of the FACOM SLS range: CT-ACC2M (D metal with 2 60 mm stainless steel snap hooks with locking screw) and CT-ACC (D metal only).
- 8 50 mm slots for CT-ACC2M or CT-ACC accessories.
- Height of the accessory storage strap: 45 mm.
- Waist size: 70 to 100 cm.
- Weight: 390 g.

CT100-140 Belt with dual point metal loop - Waist size 100-140 cm – SLS

- Belt to fasten tools of the FACOM SLS range.
- Dual point metal loop: both points must be pressed to release the loop to prevent accidental opening and ensure optimum safety.
- Supplied with comfort foam pad with velcro for optimum adjustment.
- Belt compatible with the accessories of the FACOM SLS range: CT-ACC2M (D metal with 2 60 mm stainless steel snap hooks with locking screw) and CT-ACC (D metal only).
- 8 50 mm slots for CT-ACC2M or CT-ACC accessories.
- Height of the accessory storage strap: 45 mm.
- Waist size: 100 to 140 cm.
- Weight: 410 g.

CT-ACC2M Metal ring with 2 60 mm stainless steel snap hooks with screw - SLS

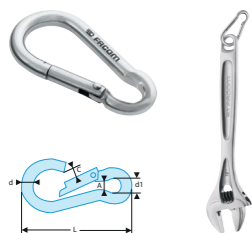

- Accessory for belt of the FACOM SLS range.
- Supplied with 2 60 mm stainless steel snap hooks with locking screw. The 2 snap hooks are integral with the "D" shaped metal ring.
- Strap width: 50 mm.
- Loop height: 50 mm.
- Internal width of the "D" ring: 50 mm.
- Internal height of the "D" ring: 40 mm.
- Acceptable rated load: 4 kg.
- Weight: 100 g.

CT-ACC Metal ring only - SLS

- Accessory for belt of the FACOM SLS range.
- Supplied without snap hook. "D" shape metal ring only.
- Strap width: 50 mm.
- Loop height: 50 mm.
- Internal width of the "D" ring: 50 mm.
- Internal height of the "D" ring: 40 mm.
- Acceptable rated load: 4 kg.
- Weight: 40 g.

60 mm stainless steel snap hook - SLS

- Snap hook in stainless steel 316: very high resistance to corrosion.
- No locking screw.
- Total length: 60 mm.
- Acceptable rated load: 300 kg.

THE SLS TOOL RANGE

FACOM has designed its new Safety Lock System tool range specifically for working in high places to eliminate the risks of accidents from falling tools, avoid losing time, and improve productivity.

Falling tools can have severe consequences if they hit a person, as well as for the company. A falling tool must be recovered, resulting in lost time. Falling tools can also damage expensive equipment, resulting in losing the tool or disturbing a production process. All these result in financial repercussions.

STRENGTH AND ERGONOMICS OF USE

- FACOM has designed a special ring system for its SLS tool range. The ring's metal was chosen to ensure unequalled strength: a tool suited to safety suffering no failure.
- The steel cable is embedded in the metal, guaranteeing a very robust "ring/cable" link. In extreme breakage situations, the cable breaks before the link.
- The cable is crimped with a servo-controlled press ensuring perfect linkage.
- In addition, each tool is checked individually using a traction machine. An individual certificate is issued, and a unique serial number engraved on the tool. FACOM ensures traceability of its production and your tooling can be followed throughout its use.
- The cable is flexible to preserve optimum tool comfort and ergonomics.

The SLS ring system slides along wrench for optimum use.

The SLS ring system associated with a ring on the shank allows the screwdriver to rotate without twisting the lanyard.

Handles of ratchets and torque wrenches are fitted with a shackle for easy fastening of the snap hook and high freedom of movement.

The SLS ring system passes through the metal part of pliers grips guaranteeing unequalled strength.

Open-end and ring wrenches SLS

Inch offset and adjustable wrenches SLS

Wrenches

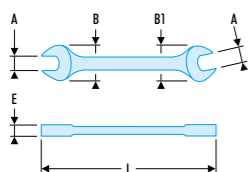

44.SLS - Metric open end wrenches - SLS

NF ISO 10102, NF ISO 3318, NF ISO 1711-1, NF ISO 691, ISO 10102, ISO 3318, ISO 1711-1, ISO 691, DIN ISO 1711-1, DIN ISO 691, DIN 3110

- Tool equipped with a FACOM SLS attachment solution, preventing any risk of accidental falls.
- The crimped "sliding" cable solution, selected and tested by FACOM, maintains user ergonomics (8 - 30 mm wrenches).
- Open end wrenches = the open ends are slimmer than a standard combination wrench for better thickness accessibility. Examples: brake calipers, hydraulic hose locknuts.
- Heads hinged at 15°.
- Metric sizes: 6 to 41 mm.
- Presentation: satin chrome finish.

54A.SLS - Metric "heavy-duty" offset-ring wrenches - SLS

NF ISO 691, ISO 691, DIN ISO 691

- Tool equipped with a FACOM SLS attachment solution, preventing any risk of accidental falls.
- The crimped "rotating" cable solution, selected and tested by FACOM, maintains user ergonomics.
- "Heavy-duty" offset-ring wrenches: wrenches for tight (unlocking, thanks to high strength of the polygonal head and long adaptable handle (to be ordered separately)).
- Ring offset to clear fingers or obstacles. Ideal for series of nuts.
- Handle to use:
 - 54.M1BSLS for the dimensions 24 and 30 mm;
 - 54.M2BSLS for the dimensions 32 to 41 mm;
 - 54.M3BSLS for the dimensions 46 mm;
- Metric sizes: 24 to 46 mm.
- Presentation: satin chrome finish.

113A.C - Chromed adjustable wrenches

NF ISO 6787, ISO 6787, DIN 3117, ASME B107.100

- Tool equipped with a FACOM SLS attachment solution, preventing any risk of accidental falls.
- Good access to the button = easy setting.
- Non-protruding moving jaw at maximum capacity.
- Pre-adjustment of jaw opening thanks to millimetric gradation.
- Right-hand button rotation.
- Range from 4" to 24".
- Presentation: chromed body and polished head faces.
- Adjustable wrench with handle ring for direct hanging by snap hook.

131A.SLS - Steel Stillson models - SLS

Tool equipped with a FACOM SLS attachment solution, preventing any risk of accidental falls.

- Capacity: 0 to 102 mm; 0 to 3"1/2.
- Very robust wrench, head hardened to 55 HRC.
- Accurate approach thanks to fine machining of the threads and button, good grip.
- "Stillson" wrench with handle ring for direct hanging by snap hook.
- Movable jaw non-removable to prevent loss or fall.

Ratchets - Torque control

3-4

1/4" maintenance free pear head ratchet - SLS

NF ISO 3315, ISO 3315, DIN 3122, ASME B107.10

- Tool equipped with a FACOM SLS attachment solution, preventing any risk of accidental falls.
- FACOM has adopted the clevis solution for particularly heavy and/or large tools.
- Very long lifetime in all working conditions. Dust proof, maintenance free mechanism.
- 72 teeth mechanism for 5° increments.
- Socket safety lock: no more sockets falling into machines.
- Drive direction switch allows easy reversal even with gloved or greasy hands.
- Palm control system - allows the operator to press down on the head avoiding risk of accidental reverse.
- Ultra-compact head.
- Bimaterial elastomer handle: high resistance to abrasion and the most severe workshop solvents: SP95, SP98, diesel fuel, acetone, brake fluid, Skydrol, Jet Oil, jet fuel.

306DSLS - Click wrenches without accessories

NF EN ISO 6789, ISO 6789, DIN EN ISO 6789

- Tool equipped with a FACOM SLS attachment solution, preventing any risk of accidental falls.
- FACOM has adopted the clevis solution for particularly heavy and/or large tools (32 - 41 mm wrenches).
- Factory accuracy: ± 2% except:
 - R.306-25D - K.306A600 - K.306A1000 (± 4%). - R.304DA (± 6%).
- Reliability of mechanism: 50 000 cycles (wrenches up to 200 N.m).
- Use possible with accessories: - End fitting: 9 x 12 or 14 x 18 mm. - Diameter: 30 mm.
- One-way wrenches usable for unscrewing by reversing the bits.
- Numbered wrenches supplied with ISO 6789 calibration certificate.
- Supplied in plastic box.
